## b. Date Hard Coal Brown Coal Briquettes (in Tons) Raw Brown Coal Coal Dust

September

27	29,347	36,422	11,511	567
----	--------	--------	--------	-----

October

4	23,409	36,927	12,224	315
5	24,150	38,250	12,074	354
7	26,262	40,150	12,155	390

2

1. [ ] Comment. After decreasing to a low on 3 October, coal stocks continuously increased until 12 October. The last reported status was 4.8 days' requirements available on 22 September. The slight improvement of the coal situation is due to increased coal imports from Poland. The coal situation, however, continued to be critical in view of intensified traffic in the fall.

25X1

25X1

2. [ ] Comment. The increase of hard coal stocks by almost 100 percent during the reported period confirms previous reports which indicated increased hard coal shipments from Poland. Coal stocks available on 12 October represented the following amounts of briquette units (BU):

25X1

25X1

Hard coal	52,900 tons	-	79,350 tons BU
Brown coal briquettes	35,200 tons	-	35,200 tons BU
Raw brown coal	12,000 tons	-	4,800 tons BU
Brown coal dust	400 tons	-	400 tons BU

Total 119,750 tons BU

The figures given for raw brown coal and brown coal dust are only estimates derived from data given in paragraph 3. The daily coal consumption quota was 22,176 tons in briquette units which was an increase of about 1,500 tons over the last reported period.

25X1

The daily coal consumption quota is calculated by dividing total coal stocks expressed in briquette units by the daily requirements given for the same day. The hard coal proportion was 66 percent of total coal stocks.
